

ASTender - Rigid Carbon Tender

A white and black inflatable boat is positioned on a sandy beach. The boat has a red outboard motor mounted at the stern. Inside the boat, there is a red fuel tank and some red ropes. The background shows the ocean with waves and a blue sky with scattered clouds. The text "ENHANCE YOUR PERFORMANCE." is overlaid on the left side of the image.

ENHANCE YOUR PERFORMANCE.

THE LIGHTEST TENDERS ON THE MARKET

Meet the ASTender range, build in carbon fiber, because performance matters.

The future is lightweight. AST is well-known for their high performance boats. As a descendant of their carbon catamarans and dinghies, the ASTender is built on the highest standards in composite production. They are robust, durable and highly efficient.

The rigid carbon construction with an epoxy infusion and foam sandwich is lighter than any RIB on the market. The rigid construction will neither deflate or age in the sun. Its gelcoat is as easy to care of as on any GRP boat. The high-quality products, like the epoxy resin, ensure longevity and no water absorption on the long term.

The stiff hull with its optimized shape needs about 35% less power than a RIB and though creates less emissions. Also it can be perfectly propelled with an electric drive.

The extra buoyancy, of the foam sandwich and the double bottom, makes the ASTenders unsinkable. That way the space of an inflatable tube can be used for storage and makes the ASTenders the most spacious tenders you will ever have used.

Enhance your performance.

RANGE DEFINITION

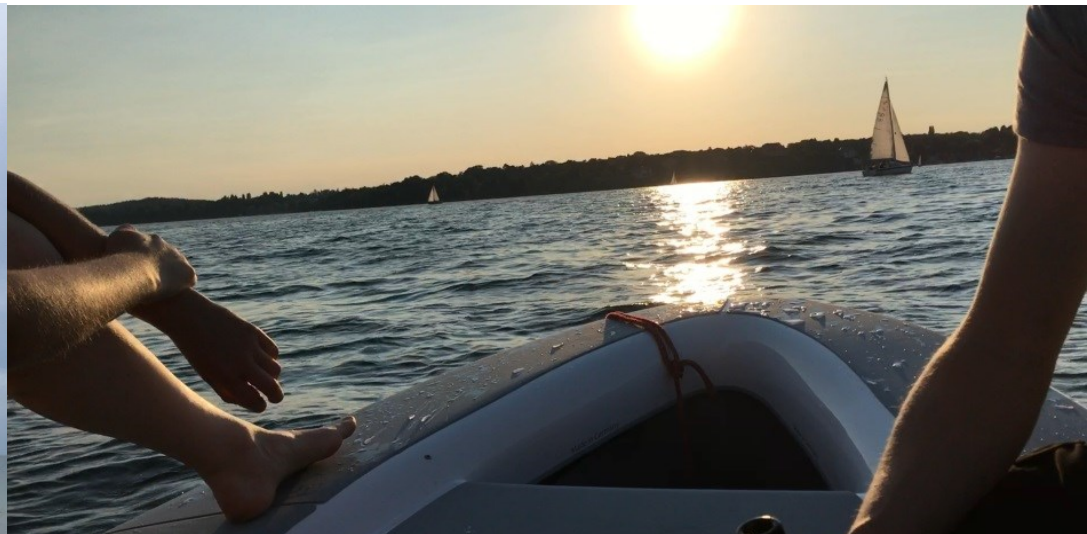

BEACH

The ultimate lightweight companion with open deck layout

COAST

The luxury lightweight tender with console steering

BEACH Range

Weight matters!

The BEACH Range is the perfect alternative for those who may have chosen a light RIB but don't want to fear any deflation or aging. It's so light that it can easily be carried by one person and pulled up the beach without breaking your back.

The super light and robust construction makes it the perfect companion for all your endeavours. The high freeboard with the deep V-keel offers dry and comfortable rides.

The spacious design can carry all your toys.

BEACH

Range

Standard equipment

- Rigid carbon hull
- Deep V-keel
- High freeboard
- Double bottom
- Nonskid in cockpit
- 5 Davit lifting points

BEACH 280	2.80m	1.50m	30kg	2.01m	0.82m	4	330kg	10	Short	C
BEACH 340	3.40m	1.62m	39kg	2.83m	0.86m	5	480kg	15	Short	C

COAST Range

When light weight meets luxury!

The COAST Range is the best alternative for those who are longing for more luxury than on an open deck boat. The helm console offers maximum control of the boat under any circumstances and still offers tremendous comfort to the driver and passengers.

The electric system provides many possibilities to further improve your tender and make it the perfect companion for all your endeavours. The high freeboard with the deep V-keel offers dry and comfortable rides.

The spacious design, with a waterproof bow locker and 4 side bags under the gunwale, can carry all your toys.
