LIMA FLAT WATER/RACE

The very direct catch and ability to redirect automatically is what makes our world champion race team choose the Lima.

Prepreg Carbon available in S, M, L, XL and XXL.
XS sold aftermarket

Carbon available in XS, S, M, L, XL and XXL.

Tiki tech (Tiki Blue) available in M, L and XL.
XS, S and XXL sold aftermarket

Tiki tech (Sonni Wave) available in S, M and L
XS, XL and XXL sold aftermarket

ENDURO SURF AND FLAT WATER

This new amazing allround blade suits anyone from World wave rider champion Zane Schweitzer to entry level flat water paddling.

The direct, powerful and extra precise paddle shape with deep side concaves gets you from zero to hero.

The wide lower part helps create a maximum efficiency area even if your stroke is not yet deep enough into the water.

That wide lower part is also great to lean on for stability in the waves and has won 3 world titles in the last 2 years.

S, M and L available in all technologies, except Carbon available in XS, S, M and L

Tiki Tech (Sonni Sun and Wave) available in S and M

XS for Kids available in Tiki tech (Tiki blue, Sonni Sun and Wave)

LIMA TUFKIN FLAT WATER/SURF

New concave and cupped blade shape integrating the very latest from our World Champion Lima paddles.

Slim profile, high stiffness and lowered weight. The large tip area allows for max forward motion even if the blade is not totally submerged.

Never before has our entry level paddle been this close to a top notch performance paddle.

Available in XL for adult and XS for Kids

* Prepreg Carbon and Carbon are available in fixed, 2pc and 3pc adjustable shaft.

* Tufskin Adult is available in fixed, 2pc, 3pc and 4pc adjustable shaft.

* Balsa are available in fixed and 2 pc adjustable shaft.

* Tiki Tech are available in 2 pc and 3 pc adjustable shaft.

* Enduro Kids and Tufskin Kids are available in 2pc adjustable shaft.

THE WALL

WHY DOES THE WALL FEEL SO STABLE, STIFF, COMFORTABLE AND FAST ?

The main body is 4.75" thick for low center of gravity for stability, enabling a more narrow/fast outline.

The 2" Wall around the standing area increases stiffness and provides further stability.

RECESSED STANDING AREA

similar to our composite board's dugout concept, this new design allows you to stand close to the water, and to use the side walls to increase stability.

FCS INSERT

From GoPro to phone holder, it is your perfect exploring companion.

AIRLINE CARBON

FASTER THAN MOST HARD BOARDS

3 FACTS ABOUT WELDED RAIL TECHNOLOGY

1

NO LEAKAGE!

Welding the rails is the only way to avoid a board leaking over the longer term. Starboard has pioneered the most advanced and reliable rail welding technology which mechanically bonds the rail layers to the dropstitch. This makes the board more durable, longer lasting and better for the environment.

2

WHY THE RAIL?

Why are we doing it on the rails? The rails of the board are the only area where 2 main components of the board; the deck and the bottom are connected. Therefore, it's a critical area for air leaking.

3

LONG LASTING!

Starboard has had a 0.38% warranty rate on all inflatable boards and a 0.1% warranty rate on Zen boards concerning leaking issues since the Welded Rail Technology was first introduced. That's only 1 out of 1000 boards. We offer this technology on all boards produced by our new, exclusive manufacturer.

① Fusion Technology is totally different from Starboard's Welded Rail Technology.

STRONGER, STIFFER, LIGHTER AND MORE RESPONSIVE

After 5 years of research and development, we introduce the next evolution of inflatable board technology.

LESS YARNS
= **LIGHTER** + LESS STRETCH
= **STIFFER**

WOVEN TECHNOLOGY

Woven fabric weighs less because it uses less material – and because it only stretches diagonally, it holds more tension. What does this mean for you? A stiffer board.

YARN REDUCTION LOWERS ENVIRONMENTAL IMPACT OF THE BOARD BY 10%

THE PERFORMANCE REVOLUTION OF DELUXE CONSTRUCTION

STRENGTH + DURABILITY

DELUXE DOUBLE CHAMBER

The welded rail technology adds durability to the board. Top and bottom layers are fused in a single, glueless process. The middle chamber further enhances stiffness and introduces a safety chamber. Galvanized 2000 D rails increases strength together. The ultra strong fin box is the top of the range in durability and function. To finish it all off, we offer the Tiki pump with an extra strong backpack bag with roller wheels and carry straps, made from 18-23 recycled plastic bottles.

DELUXE SINGLE CHAMBER

The woven dropstitch make the DELUXE SINGLE CHAMBER a solid winner at a light weight. The Galvanized 2000 D rails set the DELUXE SINGLE CHAMBER further apart together with the breakthrough welded rail technology. Single fin option boards come with an ultra strong box and toolless fin. To finish it all off, we include the Tiki pump.

MORE RESPONSIVE • STIFFER • LIGHTER
Developed by Starboard and its supplier, for Starboard use ONLY.

LINEAR DROPSTITCH

CROSS DROPSTITCH

The vertical component of the dropstitch that joins deck and bottom together (space yarns) are distributed along the length of the board in a straight line. **This maximizes the strength and rigidity of the board, providing a smoother paddle sensation and allowing you to accelerate faster with less effort.**

THE PERFORMANCE REVOLUTION OF ZEN CONSTRUCTION

STRENGTH + DURABILITY

- MORE RESPONSIVE
- STIFFER
- LIGHTER

EXCLUSIVE SINGLE LAYER LINEAR DROP STITCH

LINEAR DROPSTITCH

The unique vertical threads in the dropstitch (space yarns) are exclusively in the length direction of the board, providing a more enjoyable and solid paddle sensation.

*Developed by Starboard and its supplier,
for Starboard use only*

INFLATABLE CONSTRUCTIONS

ZEN EXCLUSIVE VALUE OFFERING

- Exclusive linear dropstitch
- Welded
- Extra rigid
- 2000 Denier stiffening side rails
- Extra safe
- High value

ZEN DOUBLE CHAMBER

The innovative Double Chamber is now available with the Zen boards resulting in a combination of the best from both worlds.

Our leanest, lightest, value-oriented inflatable board with single layer linear dropstitch, has been upgraded with a second chamber and now also offers the extra stiffness and strength of the added second chamber.

And together with the Galvanized 2000D rails, the Zen Double Chamber boards have greater strength and stiffness. Designed with only the core essential accessories, the new Zen Double Chamber is the new winner in price point offering.

ZEN SINGLE CHAMBER

Our leanest, lightest, value-oriented inflatable board – with the best core essentials.

Built with single layer LINEAR knitted dropstitch and heat welded rails, making it even stronger and stiffer than before. The single layer LINEAR knitted dropstitch was developed by Starboard in close cooperation with its supplier and is exclusive for Starboard use only.

The tool-less fin system is quick and easy to set up, now with a long and strong finbox.

HARD BOARD CONSTRUCTIONS

BLUE CARBON PRO

We set out to create a construction with the very lowest weight, best response and strongest build.

- LIGHTEST AND STRONGEST TECHNOLOGY AT THE HIGHEST LEVEL
- FULL WRAP OF THE LIGHTEST BIAXIAL CARBON FIBRE
- FULL DECK, BOTTOM, RAIL PVC SANDWICH

BLUE CARBON

The best value full carbon construction we have ever produced.

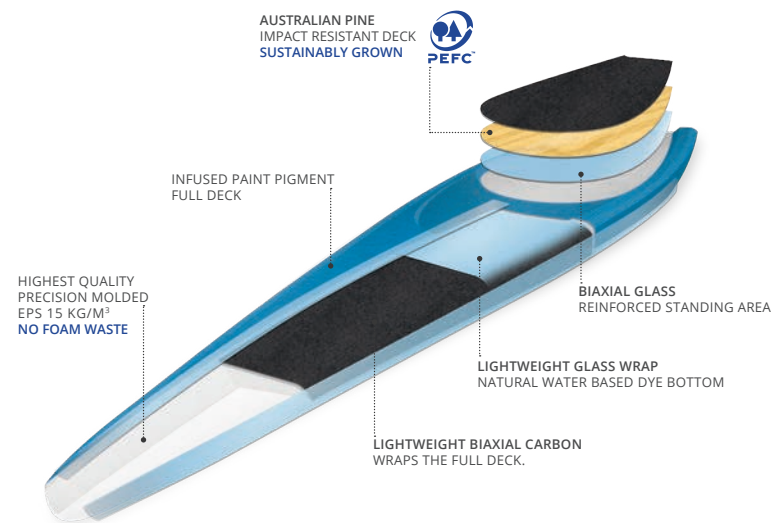

- LIGHTWEIGHT
- FULL CARBON
- STRONG AND DURABLE

CARBON TOP

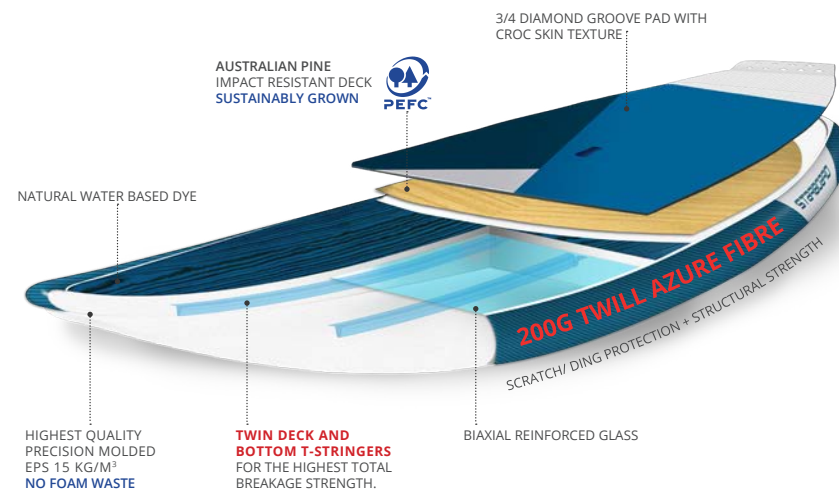

Lightness you can feel

- INCREDIBLY LIGHTWEIGHT
- FULL DECK BIAXIAL CARBON WRAP
- WOOD STANDING AND GLASS REINFORCEMENTS

STARLITE

- ULTRA DURABLE, SCRATCH AND IMPACT RESISTANT WOVEN RAIL PROTECTION
- TWIN T-STRINGER DECK AND BOTTOM - PROTECTS AGAINST TOTAL BREAKAGE
- FULL AUSTRALIAN PINE DECK - INCREASES OVERALL BREAKAGE STRENGTH.

HARD BOARD CONSTRUCTIONS

LITE TECH

- BEST-VALUE
- PRECISION MOLDED
- EXTRA STRONG

ASAP

- AS STRONG AS POSSIBLE
- SOFT RAIL
- HARD BOTTOM

TIMELESS LOOK SOLID PERFORMANCE

"I wanted to create a timeless iconic look, unlike anything in the market, totally unique, yet clean and classic." Ollie O'Reilly

The goal was to create a new look that was clearly recognisable as Starboard, but more in line with the traditional surf culture, and injected with innovation. Limited to only ever 2 colours, the white and black design is minimal and clean, yet full of detail when you touch and feel the intricate pad structure and textures.

The honeycomb pad structure makes this design truly stand out. Not only does it look unique and benefits from a reduction in weight from a full pad, we believe it offers one of the best grips we have ever used.

The small gaps between the pads give you multiple corners to wedge your feet against, providing the rider additional grip and more control to drive the board harder through turns. The diamond grooving is incredibly secure under foot, combining the corduroy wings allowing the rider to feel when they are close to the tail of the board.

In line with the timeless design, the Limited Series graphic will not change on an annual basis, to create a consistent and classic following. This will encourage dealers to keep stock knowing the graphic will remain unchanged for the next season.

The Limited Series is available in our core surf ranges including the Wedge, Pro, Longboard SUP & Surf and Hyper Nut. At a price point under Starlite, we anticipate the Limited Series will fast become a best-selling construction, positioned just above Lite Tech and under ASAP at retail.
